R-Tracker
Automatic and Efficient
Rack Scanning

R-Tracker

R-Tracker eliminates manual cassette scanning by completely automating this process. With just one-click, R-Tracker simultaneously counts and scans all cassettes and documents each one. R-Tracker detects any missing or unreadable codes, ensuring the integrity of each batch. Complete documentation ensures chain of custody in seconds.

ACCURATE AND RELIABLE
Easily detects cassettes with missing or unreadable barcodes

THREE-IN-ONE
Scan, check and track cassettes with double-sensor technology

with built-in PC and monitor

EASY INTEGRATION
Utilize MileWATCH or your laboratory's LIS system for documentation

TIME SAVINGS
Automatically scans all cassettes and their codes in just 30 seconds

without PC and monitor

KEY BENEFITS

COMPLETE DOCUMENTATION
Automatic scanning provides accurate data on the number of cassettes and corresponding codes

ERROR-FREE SCANNING
A built-in laser scanner easily locates any cassettes with missing or unreadable codes

CASSETTE TRACKING
Integrated with MileWATCH for monitoring and tracking specimens; easily shared through your LIS.

INCREASED PRODUCTIVITY
R-Tracker eliminates manual scanning, a tedious and time consuming task, and frees up tech time
